Before the Story Begins

The Flight of Shadows

At Düsseldorf Airport, Lucía stands beside the baggage carousel, phone in hand. She has called her father three times and still has no answer. Beside her, Carlos tries to stay calm, though both have left loved ones behind and carry the weight of a difficult decision.

Something strange happened during their flight. A blackout, a few impossible seconds, and the feeling that more time has passed than the clock can account for set off a chain of unsettling signs: calls from unknown numbers, photographs that seem to change, and one time that keeps returning—3:17.

The Flight of Shadows invites readers to explore two possible explanations. Perhaps each clue has a rational answer connected to the people they left behind; or perhaps Lucía and Carlos have arrived in a reality they cannot fully understand. What really happened on that flight? The answer depends on the path you choose.
